LinkedIn | GitHub | Portfolio

Senior Software Engineer | Java, Microservices, AWS, Spring Boot | Remote/On-Site

PROFILE

5+ years of software engineering experience, specialized in developing and managing complex projects. Led core projects, delivering high-quality results. Strong experience in code review, cross-team development, mentoring, requirements gathering, ensuring compliance with accessibility, agentic development, and automation in an agile environment using Scrum practices.

SKILLS

Backend:	Java, Python, C++, Go, Rust, Node.js
Frameworks & Libraries:	Spring Boot, Spring Cloud, Spring Security, Java EE/Jakarta EE, JSF, Next.js
Databases:	SQL (Oracle DBMS, MySQL, PostgreSQL), NoSQL (MongoDB)
Cloud & DevOps:	AWS (IAM, EC2, S3, Lambda, RDS, SNS, SQS, App Runner, CloudFront, etc.), Docker, Nginx, Kubernetes, Jenkins, GitHub Actions
Data Streaming:	JMS, Redis, Kafka
Testing & Tools:	JUnit, Cypress, Playwright, Gatling, Postman, Linux, Git

EXPERIENCE

Therap Services LLC

March 2021 - Present

Sr. Software Engineer

[April, 2026] - Present

- Architected an end-to-end **RAG pipeline** for Support agents using Python and LangChain, engineering autonomous Agents equipped with **custom Tool-calling capabilities**—including **real-time user access and permission checks**—to enable secure, compliant querying across a 10,000+ document enterprise knowledge base.
- Migrated core legacy messaging infrastructure from ActiveMQ to Apache Kafka, introduced a phased migration strategy with a custom synchronization bridge ensuring zero message loss (outbox pattern), resulting in a **70%** throughput gain and **40%** latency reduction.
- Steadfastly managed the **JDK 8 to JDK 21** upgrade of a large legacy codebase, planned and managed in-app and service dependencies, leveraging OpenRewrite and custom recipes for efficient execution.

Software Engineer II

[April, 2024] - [March, 2026]

- Re-engineered high-volume cron jobs and data access patterns using Oracle Coherence, advanced query optimization, and intelligent indexing, reducing database QPS and achieving a **20% reduction in latency**.
- Load-tested API endpoints with **Gatling and JMeter**, identified a bottleneck in the legacy UUID generator, and replaced it with Twitter's **Snowflake UUID**, achieving **5x insert/update** operations per second.
- Dockerized multiple legacy services, including the authentication server, and developed a single-click deployment tool, streamlining DEV and QA deployment, **cutting deployment time by 50%**, and reducing developer hardware requirements by **33%**.

Software Engineer

[April, 2022] - [March, 2024]

- Integrated **Salesforce and MaestroQA APIs** into the Therap system to enable real-time synchronization of client data, automated QA reporting, and Live Chat, streamlining customer support workflows and reducing manual intervention by up to **80%**.
- Contributed to implementing an **in-house authentication module**, RBAC, and ABAC using Spring Security featuring MFA, OAuth2, JWT, IP whitelisting, rate-limiting, CAPTCHA, etc., replacing third-party IDPs and **reducing authentication-related operational costs to zero**.
- Developed data-feed and dashboard for high-traffic, high-volume data, processing over **1 million records per day** using Spring Batch, JDBC Template, and Redis with **asynchronous processing, multithreading, and caching** for data-driven decision-making, reporting, and compliance monitoring, enabling real-time insights.

Associate Software Engineer

March 2021 - [March, 2022]

- Developed and maintained a large-scale B2B enterprise SaaS application (therapservices.net) with **40,000+ CCU (Concurrent Users)** and **1,000,000+ active users**.

- Optimized on-demand loading of resources across the system, cached static resources, and integrated CDNs, reducing network bandwidth by **20%** and improving page load time with overall responsiveness.

Tech Stack: Java, Python 3, Hibernate, Spring MVC, Spring Boot, JSF, React, JavaScript, RESTful APIs, Oracle DBMS, Oracle Coherence, Tomcat, WebLogic, Docker, Nginx, Apache Kafka, Jenkins

EDUCATION

University of Newcastle
Master of Cyber Security

Callaghan, Australia
August 2026 - July 2028

Bangladesh University of Engineering and Technology (BUET)
B.Sc. in Computer Science and Engineering

Dhaka, Bangladesh
February 2016 - February 2021

PROJECTS

Beiong.com (Live) | E-commerce Platform

- Architected and implemented the core microservice infrastructure featuring API Gateway, **load balancing**, service discovery, **rate limiting**, **circuit breaking**, auth service, and centralized configuration management using Spring Boot, Spring Cloud, and Spring Security.
- Developed multiple domain-driven microservices from scratch, including Auth, User, Product, CMS, Order, and Attachment, ensuring scalability, modularity, and seamless inter-service communication.
- Architected and provisioned a secure, event-driven attachment microservice via **Infrastructure as Code (IaC)**; built a serverless pipeline using AWS Lambda, S3, SNS, and CloudFront for asynchronous processing, while utilizing S3 Pre-signed URLs, IAM, and **OAC** to ensure secure front-end uploads and optimized, private asset delivery.
- Automated **end-to-end**, **UI**, and **unit testing** using JUnit, Mockito, and Playwright, reducing manual testing efforts, and performed load and stress testing with Gatling, JMeter, and Postman to ensure system reliability and performance.
- Accelerated microservice development by establishing a comprehensive AI-Agent Context framework—embedding design, security, and validation standards—and engineering a **multi-agent orchestration loop** (Plan, Design, Review, Test, Implement) utilizing advanced coding agents with structured **human-in-the-loop gates** for high-quality delivery.

Tech Stack: JDK 21, Spring Boot, Spring Cloud, Hibernate, PostgreSQL, RESTful APIs, Protobuf, Docker, AWS IAM, EC2, App Runner, S3, SNS, Lambda, CloudFront, RDS, Nginx (Proxy and Reverse Proxy), Next.js, Tailwind CSS, Shadcn/UI, etc.

HONORS & AWARDS

- BDMO (Bangladesh Mathematical Olympiad) District Champion in primary and secondary divisions
- IUT 2017 Hackathon Top 10
- Solved 800+ problems on different CP platforms

LANGUAGE

- English: IELTS (Band 7.0)
- Bengali: Native
